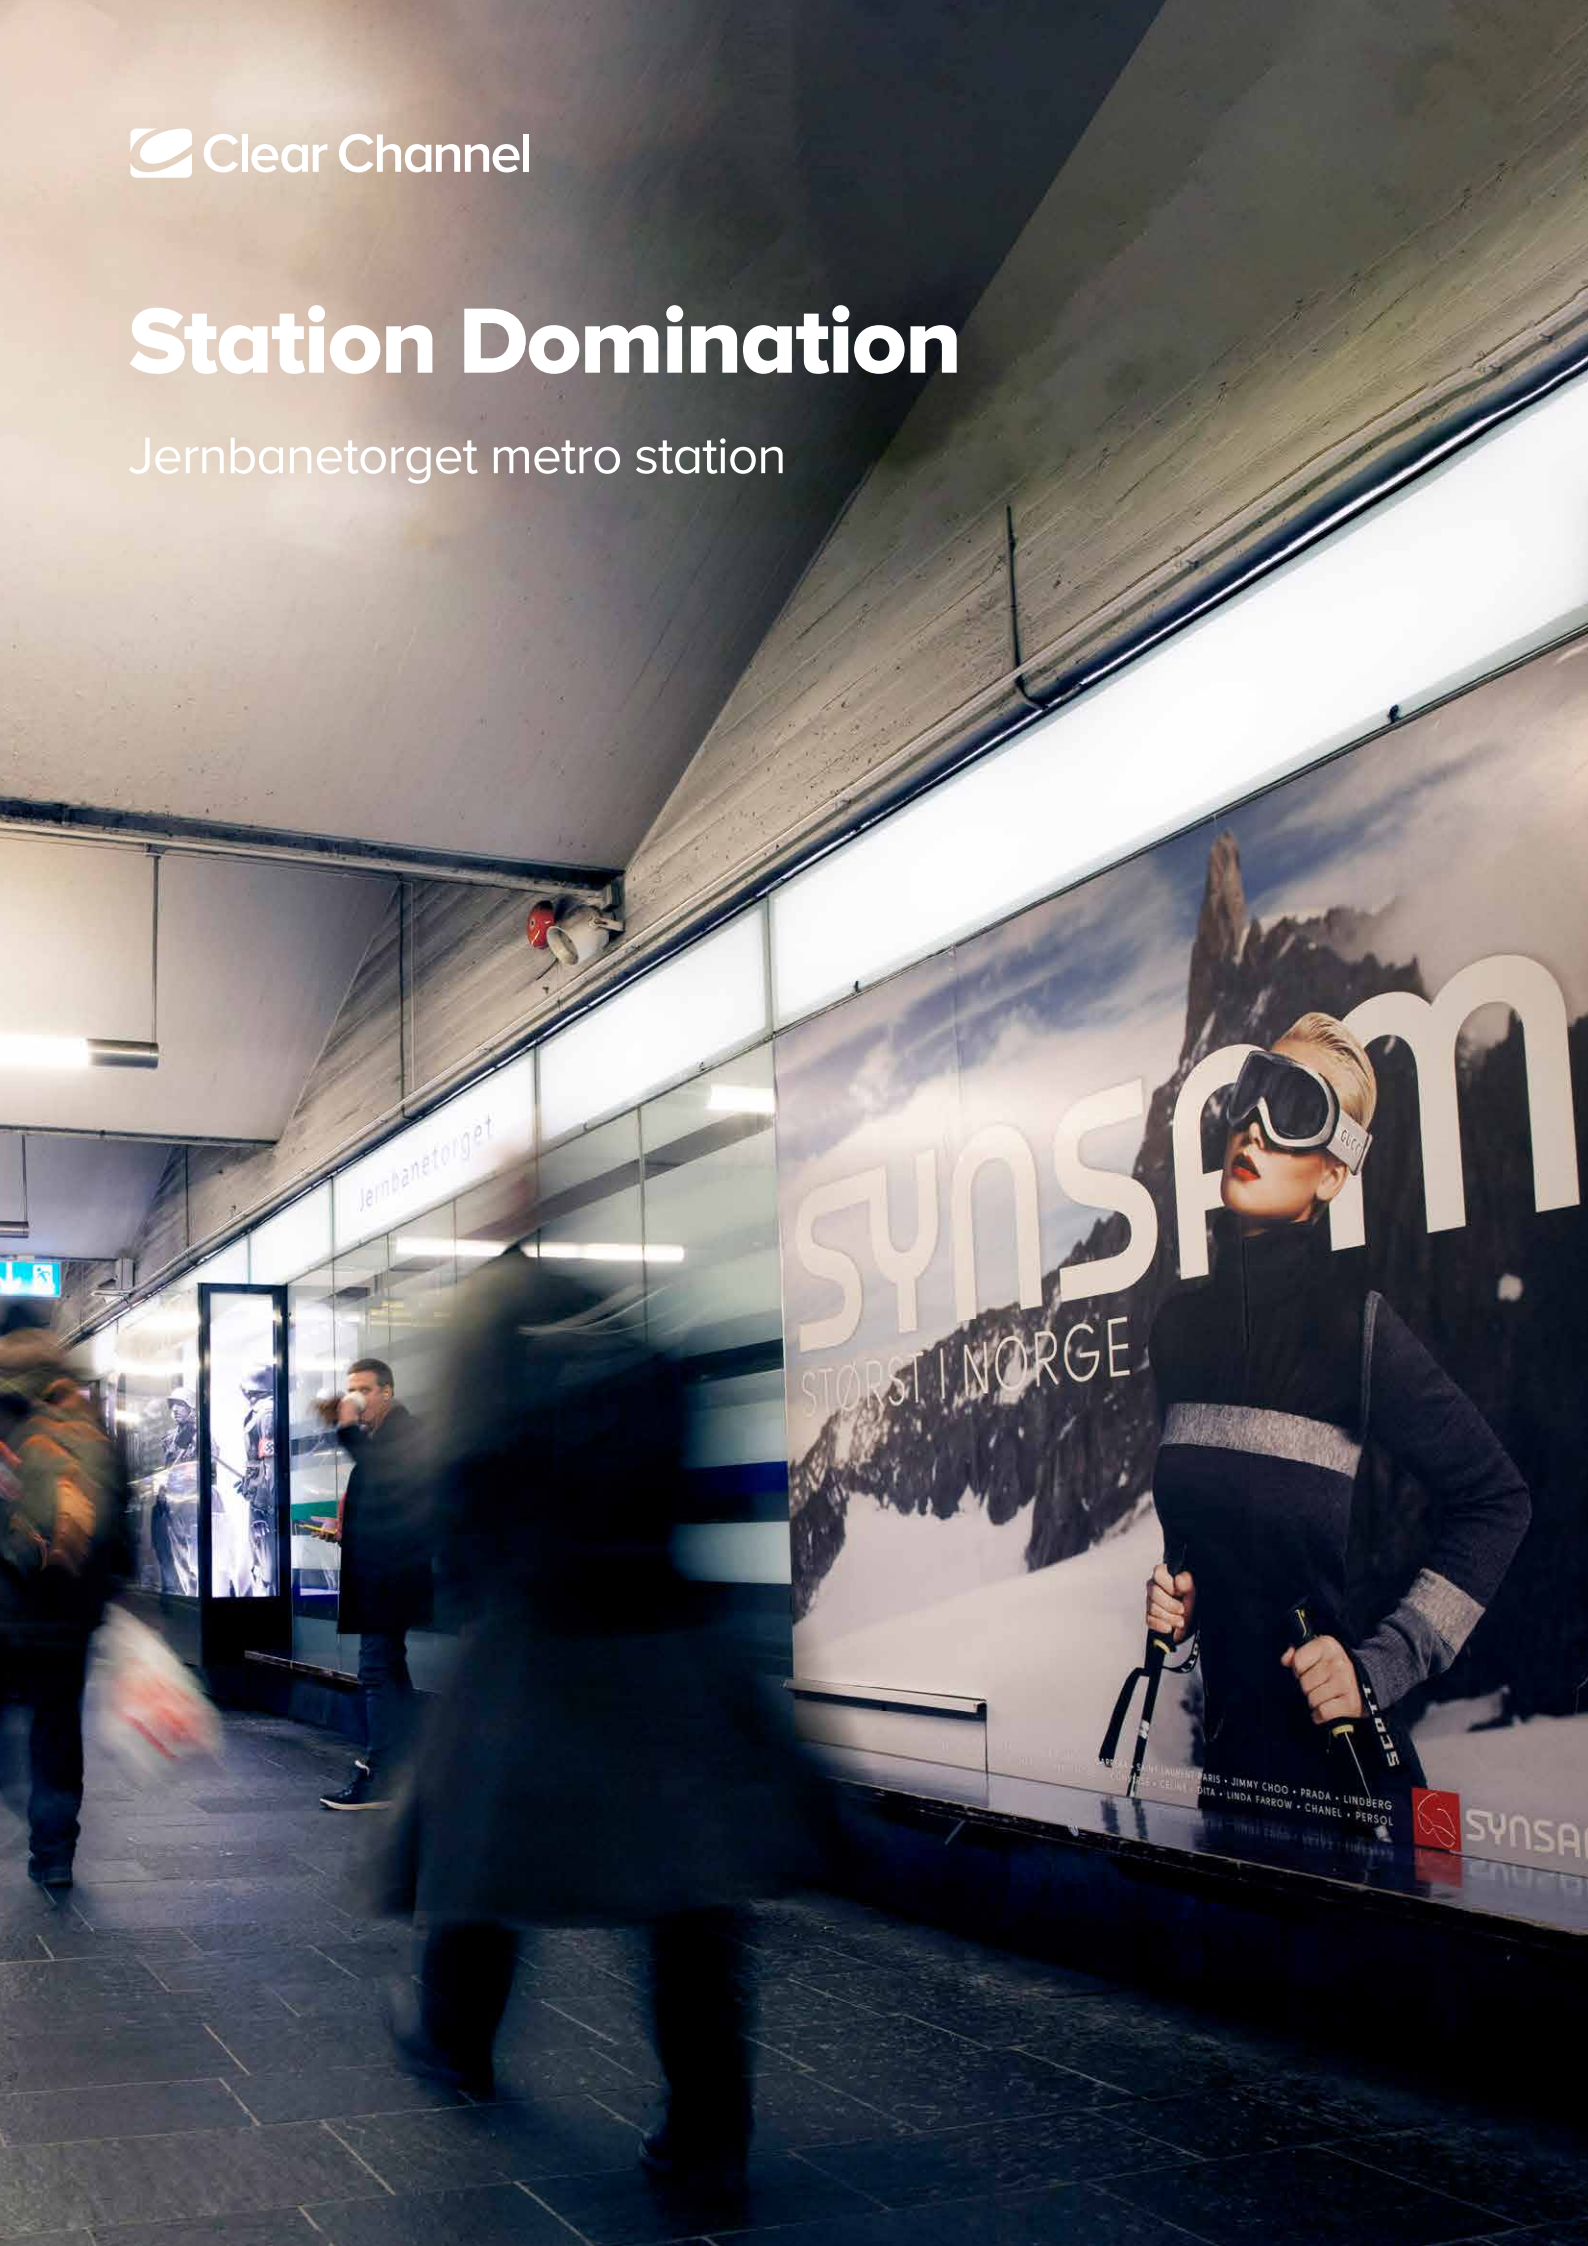
Station Domination

Jernbanetorget metro station



Station Domination

Jernbanetorget metro station

READ ME

In order to create the correct print files for Station Domination Jernbanetorget you will need the file “TSD_JBT_VEGGRISS_INDD_2022.zip”. This file contains all InDesign documents that represents each unique surface for the Station Domination Jernbanetorget.

If you don’t have this zip file, or if you have any questions about creation of Station Domination, you can send your request to campaignmanagement@clearchannel.no

Document set up

The InDesign documents are set up in scale 1:10 and are proportionally correct. In the documents you will see areas defined as safe, unsafe and offcuts (offcuts are areas which most likely will be cut off).

Safe area/white area

Keep any important information inside these areas to ensure good visibility.

Unsafe area/grey/orange area

These are areas close to the floor or roof, or areas around vents and other elements that can reduce the visibility. Some parts of the unsafe areas can also be cut off when fitting the foil.

The print PDF

Document size: The final PDF print documents are preferably made in scale 1:10.

Color profile: CMYK (FOGRA39).

Resolution: Effective DPI in scale 1:1: 150 dpi.

Bleed: 5 mm.

Layers marked “unsafe area” should NOT be included in the print documents.

The documents will be printed on SINTEF-approved 3M foil.

Name files with advertiser, week of campaign and uniqe filename, “JBT_E1”, “JBT_E2”... etc.
